

PUMPS AUSTRALIA

BETTER • FASTER • EASIER

REEFE 300, 450 and 600 Stormwater Pits

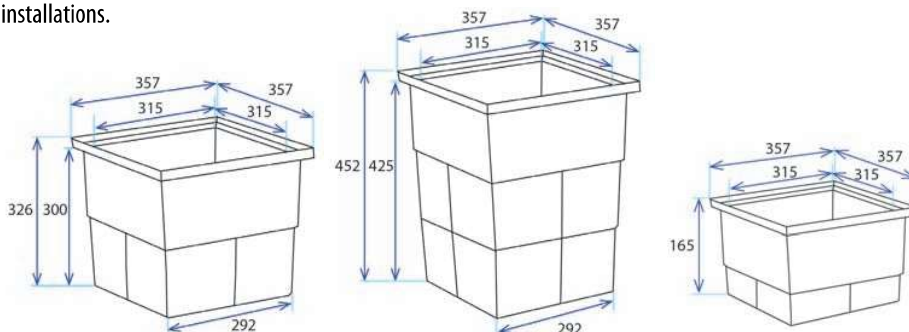

Designed for both commercial and domestic applications, REEFE stormwater pits are injection moulded in strong, durable, UV resistant polypropylene and are ideal for many trafficable areas when properly installed. Providing both an economical and efficient solution for the removal of surface water to comply with AS/NZS 3500-2003, the entire range of stormwater pits can be used with confidence and permit easy installation.

Grates and Covers

REEFE has a range of grates and covers to suit the Stormwater Pits from stylish, heel friendly EURODESIGN 316 Stainless Steel and light-weight aluminium for the Series 300 to rugged Class A and B galvanised steel in standard or heel friendly, as well cast iron and hard-wearing checkerplate for the 450 and 600 there is a cover or grate for almost every usage situation.

Stormwater Management Devices

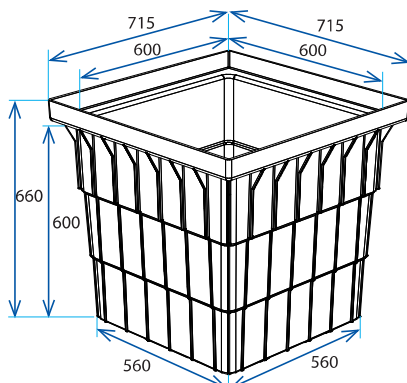

Tough polymer leaf baskets are available for the 300 Stormwater Pit. Trash Screens and SQID® devices are available for 300, 450 and 600 are designed to be simply placed into position under the standard Steel Grate to provide an efficient and cost-effective guard against trash entering the stormwater drains. No modification is needed to existing pits, and no extra work in new installations.
